Topics

We will make a **journey through the most critical events in the bank industry in the last 10 years** to see what the future beholds us. We will board the present and future of the three bank transformations in Spain: **Digital Transformation, Regulatory Transformation and Ethical Transformation.**

We will enjoy touches of sophistication through the cycle of credit: **From the traditional Credit Bureaux to Bigdata, Machine Learning and Artificial Intelligence and from the collection agencies to the Master Servicer.** We will uncover a world of innovation oriented to the **prevention of fraud, financial onboarding, cryptocurrencies, chatbots, identity validation** and many more novelties that are about to raise up.

You will have the opportunity to discover them on November 28th and 29th. Join us!

Target Conferences attendees' profile

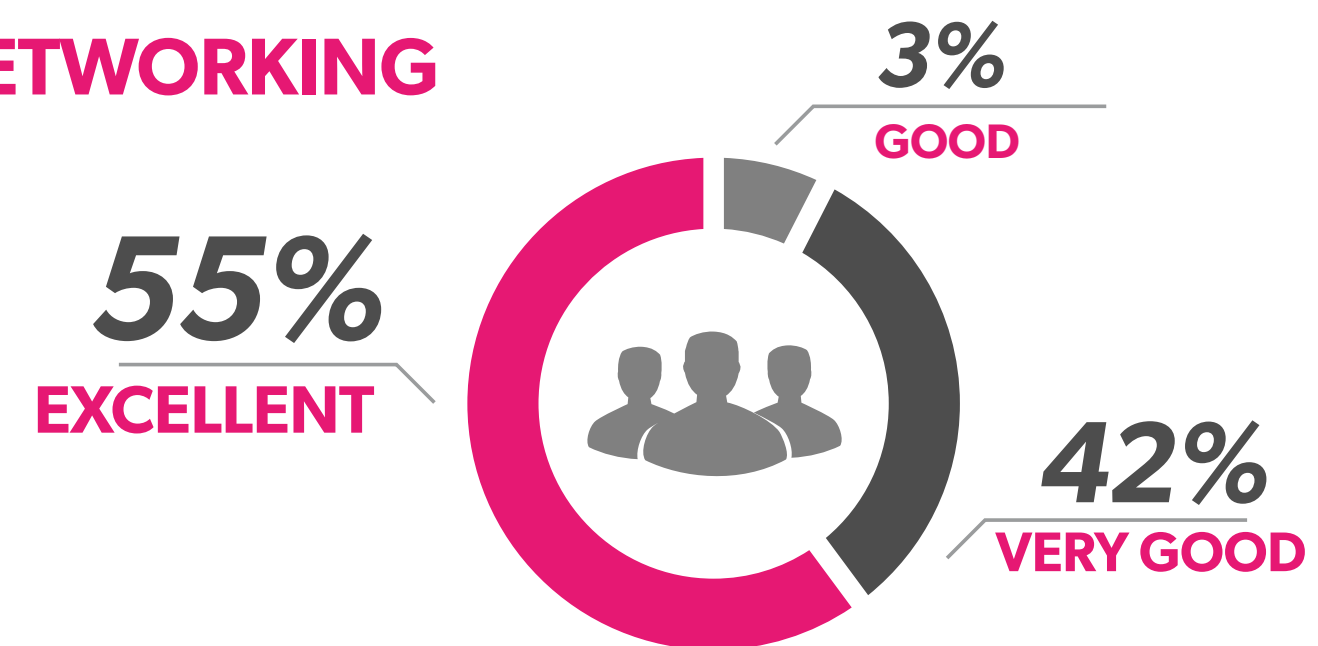

Our events have transformed themselves into the most qualified tool so that companies and key decision makers in the industry can exchange ideas and generate opportunities. The following graphs confirm the strategic importance of CMS as the best place to do better business.

ATTENDEES' PROFILE

80% of the professionals in our Conferences are the principal decision makers in the Credit and Collection Industry.
